Generac Remote Start Instructions
1. Open the controller/circuit breaker cover to access the generator’s controller panel.
2. Set the generator in OFF mode by pressing the OFF button and remove the 7.5-amp ATO fuse.
3. Remove the four fasteners from the top cover of the enclosure. Lift the top cover from the generator. Remove the two fasteners and remove the battery access panel inside the enclosure. Disconnect the negative lead from the generator battery.
4. Unplug the 20-pin wire harness connector (J5) from the controller panel by carefully releasing the latch on the side of the connector.
5. Insert the crimp end of wire #183 (010973E) into location 3 on the wire harness connector J5. Connect the other end, with the ring terminal, to the ground screw on the rear of the customer connection box.
6. Insert the crimp end of wire #178 (010973D), into location 7 on the wire harness connector J5. The other end of the wire must be connected to pin 6 the AGS.
7. Plug the harness connector back into (J5) on the backside of the controller.
8. Connect the ring terminal end of the wire #178 (010973C) to the ground screw on the rear of the controller box and the other end of the wire #178 to pin 5 on the AGS.
9. Reconnect the negative lead to the battery.
10. Install battery access panel and tighten the two fasteners securely. Install the enclosure’s top cover. Tighten all four fasteners securely.
11. Replace the 7.5-amp ATO fuse. Ensure the generator switch is in the OFF mode (red light on the control panel is on.)
12. Perform the following steps to enter the password and enable the two-wire start.
   a) Press the escape key to display the menu screen.
   b) Press the following key sequence (the password) (See Note 2): UP, UP, ESCAPE, DOWN, UP, ESCAPE, UP
   c) Use the UP/DOWN arrow keys to navigate to the "SUB MENU" field and then press "Enter" to display the sub menu.
   d) Use the UP/DOWN arrow keys to navigate to the "DEALER" field and then press "Enter" to display the dealer menu.
   e) Use the UP/DOWN arrow keys to navigate to the "DEALER-EDIT" field and then press "Enter" to display the dealer edit menu.
   f) Use the UP/DOWN arrow keys to scroll through the parameters until "2 WIRE START SELECT" is displayed. Press "Enter" to select this parameter as the one to be edited.
   g) Use the UP/DOWN arrow keys to change the display to read "Yes."
   h) Press "Enter" to store the data. Remote start is now enabled.
13. Set the main switch on the generator to the AUTO position.
14. After completing installation, verify that the two wire start is functioning properly.

Magnum Energy, Inc. provides this diagram to assist in the installation of the Auto-Generator Start controller. Since the use of this diagram and the conditions or methods of installation, operation and use are beyond the control of Magnum Energy, Inc., we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of the installation, operation and use of this unit.
