

12LP10 SERIES INVERTER

Pure Sine Wave Output

The 12LP10 Series Inverter from Magnum-Dimensions provides pure sine wave power in a compact chassis to help power all of your sensitive electronic loads.

The 12LP10 Series Features:

- **GFCI Outlet:** Provides 120 VAC output as well as receptacle protection.
- **Unit Protection:** Provides automatic electronic short circuit/overload protection, automatic over-temperature shutdown, and an AC output circuit breaker.
- **Status LED:** Provides inverter operation mode and troubleshooting information at a glance.
- **Low Battery Protection:** Automatically shuts down at 10.5 VDC with in-rush delay. The end user may also select an optional setting of 11.7 VDC.
- **Battery Surge Protection:** The 12LP10 has an input DC voltage range of 10.5 - 16 volts. The inverter can tolerate up to 24 VDC for five minutes, then will shut down to preserve the system.
- **Auto Sleep Mode:** Auto sleep mode helps preserve battery life over long periods of no load operation.
